Core Message

➢ Agriculture needs to be more involved in the Global Health Security Agenda
FAO’s Contribution to the GHSA

- Contribution to GHSA Action Packages, especially those on AMR; zoonotic diseases; biosafety & biosecurity; laboratory systems; real-time surveillance; reporting; workforce development; and multi-sectoral rapid response;

- Advisory role;

- GHSA Joint External Evaluation missions;

- Regional registers / rosters of FAO experts
FAO’s Contribution to the GHSA

- Antimicrobial Resistance
- National Laboratory System
- Emergency Operations Centers
- Zoonotic Diseases
- Surveillance
- Biosafety/Biosecurity
- GHSA Reporting
- Workforce Development
FAO Country and Regional Representation Offices
FAO and One Health

• Tripartite: FAO, OIE & WHO;
• Global Early Warning System (GLEWS)
• Global Framework on Transboundary Animal Diseases (GF-TADS)
• One Health is central to FAO’s contribution to the GHSA
• Human / livestock / wildlife/environment interfaces with threats such as Ebola, MERS and Zika;
• Food safety (Codex Alimentarius)
• Inter-disciplinarity
Enhanced FAO Coordinator and Facilitator Role

• FAO is a valued technical adviser;
• Coordination and facilitation role in the GHSA;
• FAO and OIE work closely together on animal health related issues;
• GHSA synergizes with EPT-2 programme;
• Engagement with Ministries of Agriculture and Veterinary Services
• FAO provides an essential *One Health* link in the animal-food-environment interface
Agriculture needs to be more involved in the Global Health Security Agenda
Terima Kasih!
Thank you
