

ACTION PACKAGE PROGRESS

Jacob H. Eckles, MPH
GHSA Action Package Coordination Meeting
Jakarta, Indonesia
August 23-25, 2016

TRACKING PROGRESS

3 proposed indicators of Action Package progress:

1. Developing annual plans

- Identifies shared and individual member activities and goals

2. Communicating among members

- Intra-Action Package information sharing, including joint planning

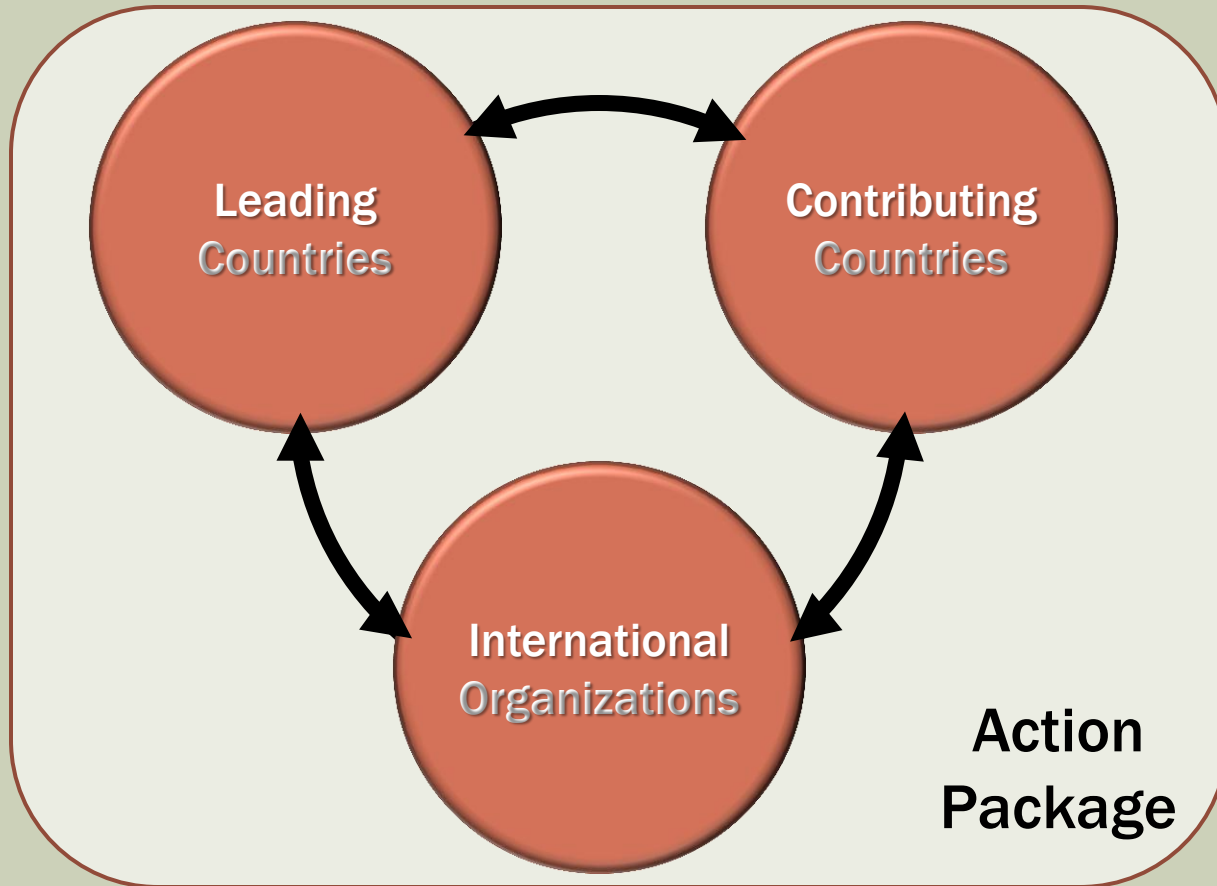

3. Sharing tools and expertise with others

- Knowledge transfer to support GHSA partners outside the Action Package

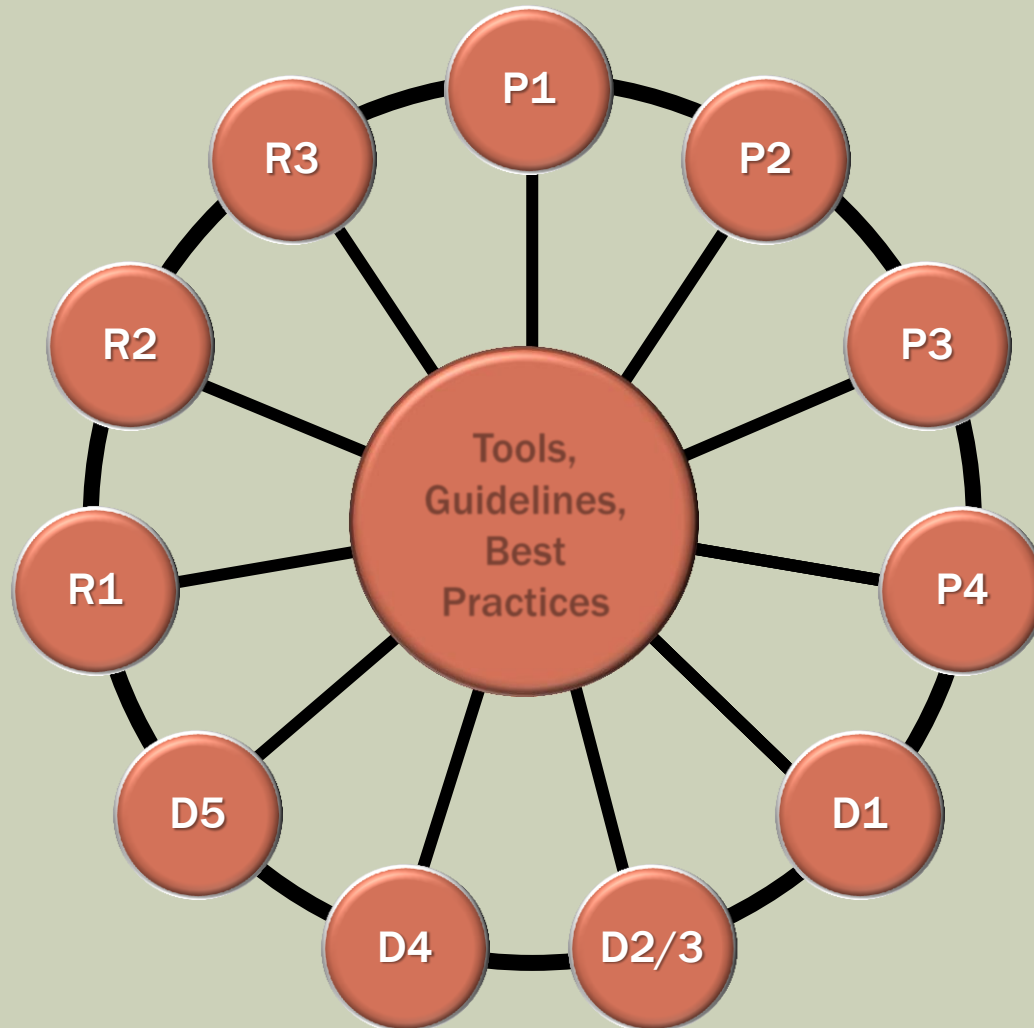

ANNUAL PLANS

- Provides an overview of the plans of individual members and the Action Package as a whole
- Guides the work of the Action Package partners
- Principally useful for Action Package partners
- Where possible, identifies timelines and milestones for activities
- Indicates how activities support the Action Package target

COMMUNICATION AMONG MEMBERS

SHARING EXPERTISE

MOVING FORWARD: NEXT STEPS FOR ACTION PACKAGE IMPLEMENTATION

■ Focus on Work

- Annual Plans to focus action and incorporate countries
- Leading and Contributing countries should explore methods of cooperation, including online collaboration and in-person meetings

■ Emphasis on Concrete Deliverables

- Action Packages are encouraged to develop documents or materials that assist countries implement activities toward the AP target
- Action Packages should consider collaborative activities

Action Packages

In order to facilitate progress toward the common GHSA goals, the "Action Package" concept was developed to provide focus and structure to priority technical areas.

During a meeting in Helsinki, Finland, in early 2014, member countries identified eleven discrete GHSA Action Packages, which were discussed further in Jakarta, Indonesia, later that year and finalized in Washington, DC, at the first GHSA High Level Event in September 2014. Technical experts from countries around the world worked collaboratively to shape these Action Packages and continue to lead and implement them. The 11 Action Packages have been agreed upon by all GHSA countries. In developing these Action Packages, the goal has been to translate political support into action and to guide countries toward achieving the GHSA targets.

All GHSA member countries participate in one or more Action Packages and may choose to fulfill this commitment by building capacity at a national, regional, and/or global level.

Each Action Package includes a 5-year target, an indicator (or indicators) by which to measure progress, and lists of baseline assessment planning monitoring and evaluation activities to support successful implementation.

The Action Packages

- [Detect 2 & 3: Real-Time Surveillance](#)
- [Detect 4: Reporting](#)

GHSAGENDA.ORG

Each Action Package has been given space for public sharing of documents, resources, and materials. As developed, items can be posted for sharing across the Action Package(s) and beyond.

TRACKING PROGRESS FOR MINISTERIAL MEETING

- Need to show concrete progress, meeting milestones and activities
- Collaborative work toward the GHSA targets outlined in the Action Package
- Needs for support from the Steering Group

Prevent-1: Antimicrobial Resistance

Action Package Leadership	<i>Leading</i>	Canada, Germany, Netherlands, Saudi Arabia, Sweden, United Kingdom, Japan, EU Cion
	<i>Contributing</i>	Australia, Colombia, India, Indonesia, Italy, Norway, Portugal, Switzerland, Thailand, South Africa, United States (TBD: Zimbabwe, Bangladesh)
