

Detect 1 National Laboratory system

# EXPERIENCE FROM JEE MISSION

# Preparation

- Revisit national laboratory system
  - Identify gaps and needs
  - Stakeholder engagement
    - Communicate with multi-stakeholder to verify the information
  - OneHealth approach
- 

# External assessment

- Gaps and needs are confirmed by external assessors' opinion
  - Scores are related to national norms/targets, un-comparable with other countries' scores
- 

# Priority actions

- Enhance data linkage systems between laboratories and the epidemiology sector to support surveillance, risk analysis, and early warning system
  - Implement laboratory licensing process and framework at relevant public health and animal health laboratories
  - Enhance collaborative efforts on laboratories among relevant agencies and between the human health and animal health sectors according to the One Health Approach)
  - Leverage direct networking and collaboration with national reference laboratories that have demonstrated capacity, and with other potential national reference laboratories or relevant institutes
- 

# Next steps

- Use momentum from JEE to fill gaps and strengthen the NLS system
- Spin off
  - The JEE process help in enhancing networking among stakeholders from both human and animal health sectors.
  - Knowing each other : who do what and how to
  - Learning from experts
