

# Track Progress on Commitments

(Formerly, Mutual Accountability Framework)

Chaeshin Chu, PhD

Korea Centers for Disease Control and Prevention

January 21, 2017

GHSA Steering Group Meeting, WHO Headquarters, Geneva, Switzerland

# Background

- Nations and multilateral organizations have made significant commitments to GHSA and health security in the last several years.
- These commitments add up over to 1 billion dollars and to build capacity over 100 countries.
- These commitments provide outstanding momentum to reaching GHSA goals.
- To take full advantage of these commitments and to continue the momentum, the GHSA SG should create a mechanism to catalog and report on these commitments to all GHSA members.

# Objectives

- Create a mechanism to catalog progress and report on success from these commitments/both multilateral
- Each SG meeting could report on commitments made.
- Use “success and commitments” documents from Rotterdam as a template for reporting out to SG meetings and ministerial meeting

# Point to discuss

- Mechanism
  - As a new job for SG Chair, it will create a template and ask each country or multilateral organization to report for each SG meeting
    - Number of times to report?
  - The SG Chair will also work to create an end-of-year report on these commitments for the Ministerial Meeting.
- Scope
  - Donor commitments
  - National commitments (domestic commitments to health security)
